Curriculum design

Important notice

At application stage full partner HEIs must demonstrate to have fulfilled the external Quality Assurance (QA) requirements of their jurisdiction for the joint programme.

- This can result either (i) from having successfully implemented the European Approach for Quality Assurance of Joint Programmes (if national legislation allows),
- (ii) or be based on a specific accreditation/evaluation of the joint programme,
- (iii) or of each national component on the basis of which the EMJM is composed.

Accreditation

The European Approach for Quality Assurance of Joint Programmes has been developed to ease external quality assurance of these programmes. In particular, it will:

- dismantle an important obstacle to the development of joint programmes by setting standards for these programmes that are based on the agreed tools of the EHEA, without applying additional national criteria, and
- facilitate integrated approaches to quality assurance of joint programmes that genuinely reflect and mirror their joint character.

- Sustainability

Minimum 10 pts

Threshold at 70 points

Criterion 1 – Relevance (2021)

„The overall and specific objectives are very well defined and are relevant to the EMJM.

The joint masters clearly addresses the needs identified from appropriate sources, for example, institutions, business sector, students, lectures, scholars and policy makers.

The needs clearly respond to the UN Agenda 2030.

The EMJM is critical to achieving strategic food production and security goals.

The scientific areas of the academic content are properly identified.

The project has potential to increase the attractiveness of the European Higher Education Area, which is attributed to the popularity of previous editions, successes and accolades of the programme, and the strong participation of the food industry.

The strategy for internationalisation is credible since results of the programme can be transferred and adapted to any river basin region.”
